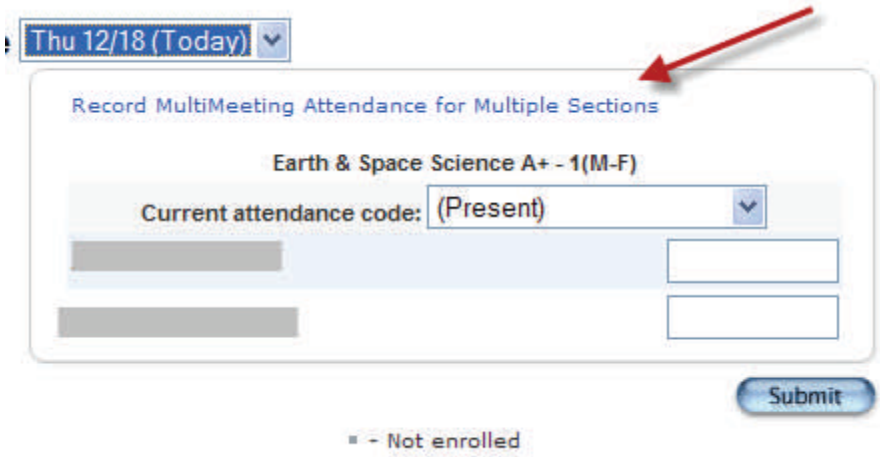
Taking Attendance for Multiple Sections

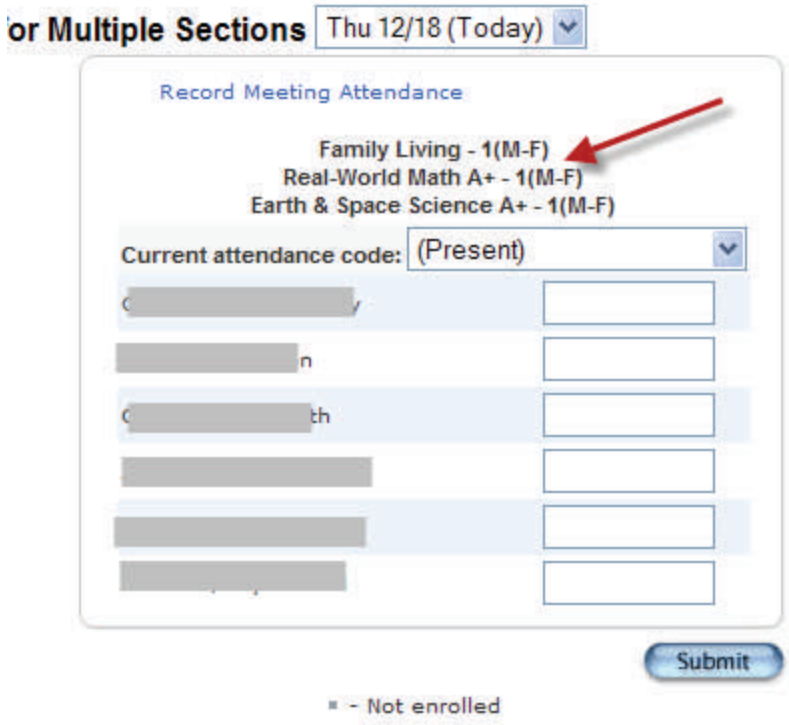
If you teach more than one class during a period you can take attendance for all classes at once.

At right is a teacher's schedule as they see it in PowerTeacher. This teacher has three first period classes.

To take attendance click on any one of the chair icons.

You will then see the attendance screen, click on the link at the top to 'Record MultiMeeting Attendance for Multiple Sections'. The page will refresh and you will see all students in all classes for that period.





Enter your attendance and submit, you are done.
